

TEXSTAR

Build your world. Build your brand. | A/W 2022

DESIGNING FOR AWESOME WORKING DAYS.

YOUR LOOK – YOUR BRAND.

Most companies understand the importance of operating and being perceived as a single brand. A company's staff are its brand ambassadors and should present an attractive and cohesive image – whether working out in the field or in a shop, a warehouse or an office. Texstar has something to suit everyone.

One size fits all is not part of our concept. That's why we offer a wide variety of sizes and cuts for both women and men, to suit different body shapes. Our clothes are stylish and well designed – garments that people enjoy wearing.

Our product range is built around five clearly defined basic colours: white, red, blue, grey and black. You can add a personal touch with accent garments and accessories.

We call this *The Texstar Experience*.

CLOTHES WITH A PERFECT FIT FOR TOUGH CONDITIONS

Wopio is one of Sweden's leading traffic safety companies when it comes to developing advanced safety solutions. They have long experience of making cities and traffic environments safer for road users and everyone who has roads as their workplace.

With the right design and the latest innovations, they contribute to achieving Sweden's zero-tolerance vision of a future road transport system that poses no threat to people's life and health.

We have long experience in leading some of Sweden's biggest traffic safety projects, and there aren't many situations we haven't seen over the years," says Mikael Mattsson, Sales Manager.

"When you're out working on roads, it's crucial to have suitable equipment that protects you in vulnerable work environments."

Well-dressed for all occasions

"At the same time, our daily work involves representing the company in a diverse range of settings, from government and municipal premises to car parks and petrol stations. This means it's important to feel well-dressed – and that's how Texstar

clothing makes us feel," Mikael points out.

"After trying other suppliers with previous employers, I'm impressed at how Texstar successfully combines solid function with fashionable design and a comfortable fit."

Phenomenal freedom of movement

Mikael explains that employees really appreciate how well the clothes fit. Someone even said that they feel like the technical clothing you might wear at home. Many of the garments have integrated stretch fabric offering excellent freedom of movement. This is greatly appreciated when you move around a lot at work.

"We frequently perform quite

challenging jobs on site, and there's no margin for error. The ease of movement and many functional details that Texstar garments provide really come into their own in these situations. You can tell that a lot of effort went into understanding how the clothes will be used," says Mikael.

Getting seen with Texstar Hi-Vis

"And then of course there's the safety aspect. Texstar's Hi-Vis clothing does a great job at combining exceptional visibility with outstanding design and fit. Anyone who's considering getting high-vis clothing should definitely take a look at what Texstar has to offer," concludes Mikael Mattsson from Wopio. ★

TEXSTAR AND THE ENVIRONMENT WE DON'T TALK, WE CERTIFY.

*As a textile supplier, Texstar takes a clear stance.
We strive to make the production chain as
sustainable as possible.*

Sustainability is a widely talked about issue, but its meaning is not always clear.

Sustainability is often discussed from three perspectives: environmental care, ethical production and financially sound solutions.

We aim for sustainability to permeate all aspects of our business. This requires us to make choices in many areas including design, production, logistics and recycling. We seek to balance the three sustainability perspectives so that we really make a difference.

We operate in a competitive market and must adapt to prevailing conditions – but we can't use that as an excuse

*Our GOTS-certified Eco Fusion Pique.
You find it on page 43.*

for not making changes. Many things can be changed, even though it might not be easy. But who says it should be easy?

Safe, secure development

We believe it's vital to be able to show what you do – and how you do it. That's why we're engaged in a number of initiatives that ensure we continue developing and improving.

We believe in using widespread and recognised tools such as certificates, registrations and tests to show we're on the right track. This keeps us developing in the right direction as a company, and shows you how we operate and strive for success.

Certificates that promote change

The Global Organic Textile Standard (GOTS) imposes perhaps the strictest requirements through the entire production chain. To obtain GOTS certification, it is necessary to demonstrate how products are produced in an ecologically sustainable manner. Texstar is proud to offer GOTS certified products in its portfolio today.

Amfori is a global organisation that brings together over 2,000 textile companies. Its mission is to enhance human prosperity and use natural resources responsibly. Amfori works with issues that require cooperation in order to make a difference, enabling businesses to drive changes together. >>

“We can’t rely on first impressions. It’s important to look around and examine everything in detail, speak to the staff and hear what they have to say.”

KATARINA GRÖNHAUG
PURCHASE AND ASSORTMENT MANAGER

Certificates that provide peace of mind

Our *ISO environmental certificate (ISO 14001:2015)* is an important tool for us. It ensures that we never stop striving to further improve our performance.

Oeko-Tex is another international organisation that tests and certifies textile production. It allows consumers to rest assured that a product meets certain safety requirements with regard to harmful substances. Texstar products meet the requirements for Product Class II: items with direct prolonged or large-area skin contact.

In addition, the *EU REACH Regulation* requires all substances used to be registered, risk assessed and authorised. Needless to say, we take our responsibility and provide the information required according to REACH.

A clear direction

Certificates are important. You can read more about them on the next page. But we also take a more hands-on approach, instead of trusting individual producers to keep their promises. We’re not content with having agents and production offices check that our suppliers keep their promises. Instead, we work closely with our supplier factories and regularly visit them to check that their processes are in order.

You can’t simply trust your first impressions. It’s important to look around and examine everything in detail, speak to the staff and hear what they have to say. If there’s a high staff turnover, for example, it could be a sign that something isn’t right.

The dyeing process poses serious health and environmental risks. We aim for our partners to use closed systems in which the water is treated and reused. Far too many water flows have been polluted and will take a long time to recover.

We only use a third party for unannounced spot checks to ensure that production is not outsourced to unknown subcontractors.

Overall, we’re moving in a clear direction: We’re on the way towards a really sustainable product range, and this isn’t just empty talk – we strive to take a clear step forward every year.

ISO 14001:2015 environmental certification

Textstar is environmentally certified according to ISO 14001:2015. This demonstrates our ambition to continuously develop our environmental management so that everyone in the company works in the same direction. Our environmental policy also helps our subcontractors comply with our environmental goals. Our ISO certification supports us in achieving our continuous environmental improvement goals.

GOTS (Global Organic Textile Standard)

GOTS imposes strict requirements throughout the production chain with regard to both environmental impact and working conditions in the textile and clothing industries. GOTS supports organic, sustainable farming without the use of toxic pesticides and fertilisers, with the vision of achieving ecologically sustainable production in terms of materials, packaging and logistics. Read more on global-standard.org

Amfori – trade with purpose

Amfori BSCI (Business Social Compliance Initiative) brings together over 2,000 retailers, importers, brands and associations from more than 40 countries. Amfori's mission is to enable each of its members to enhance human prosperity, use natural resources responsibly and drive open trade globally.

These are major challenges that can only be tackled through collaboration. Together we can influence and drive positive change on a large scale. Read more about this work and Amfori BSCI's 11 Principles on amfori.org.

Amfori BEPI provides control at all stages

The Amfori BEPI platform allows us to monitor the whole production chain from a sustainability perspective, and offers a tool for promoting sustainability right down to factory level. By focusing on the most important areas and locations in our sustainability efforts, we support the global goals of the Paris Agreement and UN Climate Goal 12: Responsible consumption and production. Read more on amfori.org.

FIVE IMPORTANT COMMITMENTS:

REACH limits diffusion of hazardous chemicals

REACH is a European Union regulation aimed at reducing the diffusion of hazardous chemicals. REACH requires all old and new chemicals on the market to be registered, evaluated and authorised. This means that Textstar is required to:

- register the chemicals we manufacture or import
- prepare and supply a safety data sheet or equivalent information to the recipients of the chemicals
- ascertain whether a permit is required for the chemical in question
- if we want to continue using or releasing a chemical in a market where a permit is required, we must apply for a permit
- keep abreast with any limitations that apply to the chemical or mixtures containing it.

You can read more about REACH on the website of the Swedish Chemicals Agency (Kemikalieinspektionen), www.kemi.se.

Oeko-Tex Standard 100

Clothing production is a global process in which the various stages of production – from raw materials to finished products – are often located in different parts of the world. Oeko-Tex is an international organisation where textile products are tested and certified through all stages of production by independent international institutes. The Oeko-Tex criteria catalogue is aimed at creating a collective vision regarding potentially harmful substances.

Oeko-Tex provides companies in the textile and clothing industry with a set of common assessment standards, while giving end consumers the benefit of tested safety, for instance in the form of skin-friendly clothing.

The requirements of the standard vary according to the intended use of the end product, and are divided into four product classes. Textstar products meet all the requirements in Product Class II regarding the materials and components used. This gives you assurance that Textstar clothing is safe to wear against your skin. Read more about Oeko-Tex on www.oeko-tex.com

SHOP TEXSTAR

– DIRECTLY IN YOUR OWN WEB SHOP.

It should be easy to be a Texstar customer. We are setting up an online shop in partnership with one of our resellers. You get access to the whole Texstar range and we take responsibility for delivering products according to your requirements – complete with logos and applications in accordance with your manual.

In our large warehouse, most items are continuously available for quick next-day delivery. Simple, flexible and accessible.

While our website texstar.se is our face to the world, the well-oiled machinery behind the scenes is what creates the real benefits in coordinating your purchases with us.

A flexible and customisable solution

More and more companies are seeking solutions that can easily be integrated into their business. Our online shop can be tailored to a company's corporate image, product range and preferred service level – which may include aspects such as availability, delivery times and giving Texstar responsibility for the entire stock management function.

From order to delivery

How it works. A company's online shop can be located on a separate website

or integrated into its intranet. The company's authorised orderer logs in and orders the goods required. The orderer can immediately see the stock balance, delivery times, etc.

Most of the items are already tailored to the company, but you can add print and embroidery to certain items for individual events. This is done on the MyLogo page – a convenient service that is easy for the orderer to use.

Full control and efficient logistics

After that, Texstar takes over the process and picks the articles from the company's shelves at our warehouse. The logos and applications are already tailored for your company, but can be further customised, e.g. for individual campaigns. Everything is packed and transported directly to the agreed

location, giving you full control of deliveries and all costs.

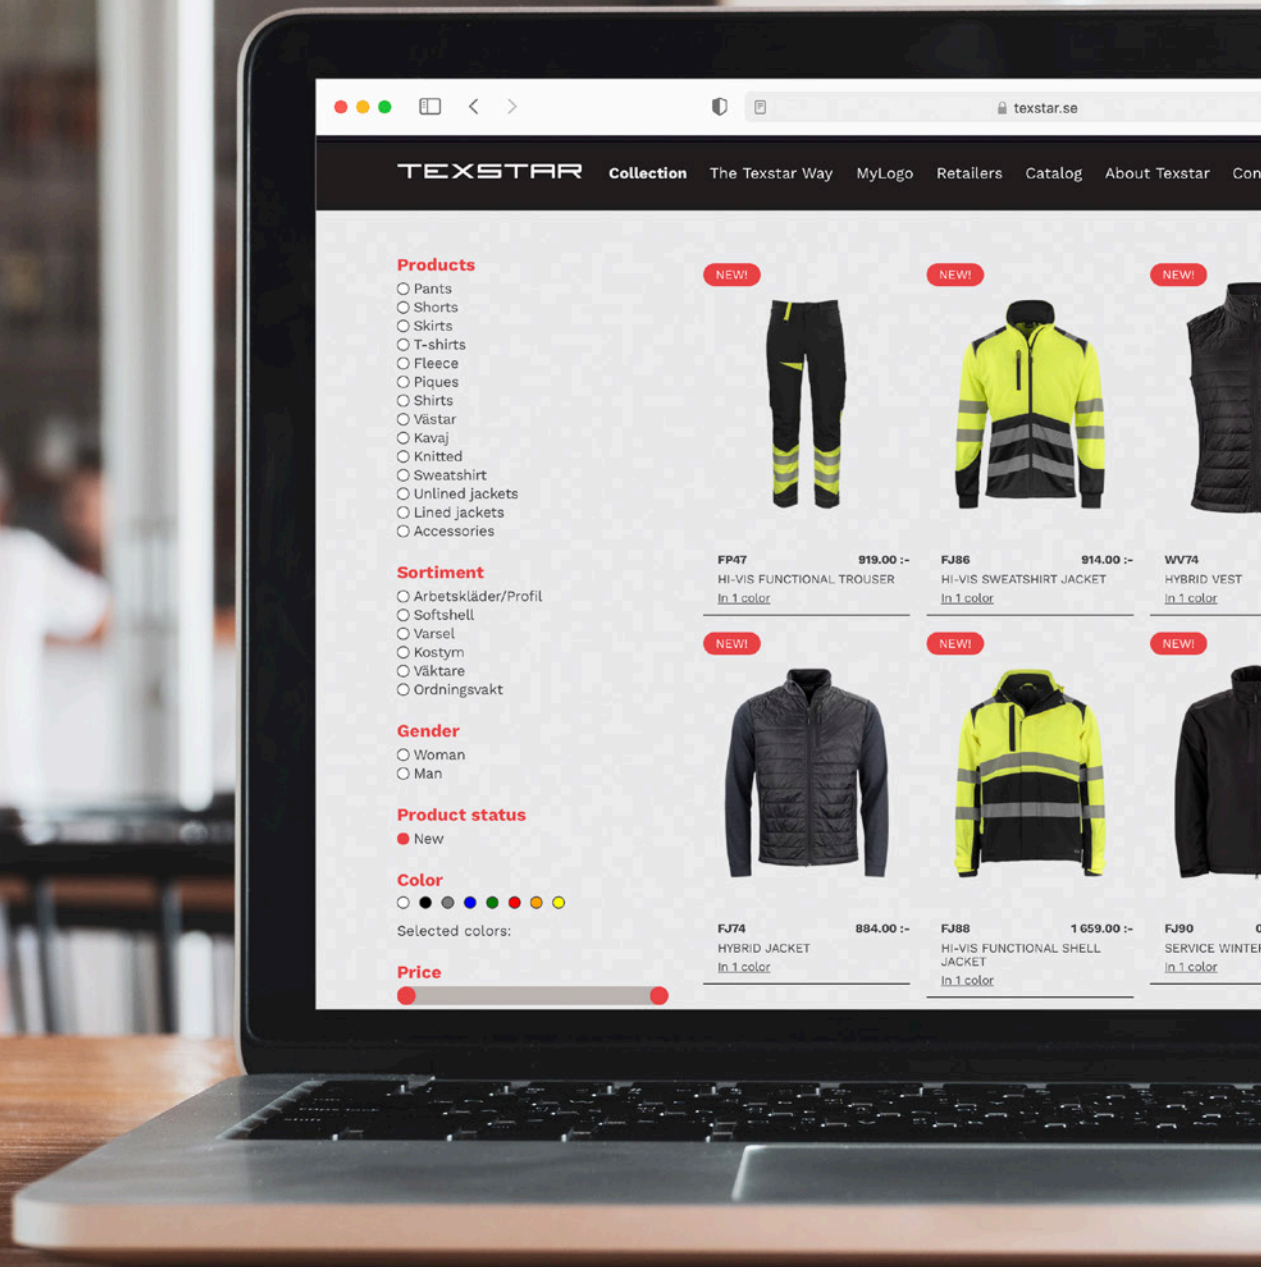

Texstar supplies an integrated range

Texstar strives to continuously develop and improve. Our collection is designed to meet most needs in an organisation, with a range of clothing that suits everybody.

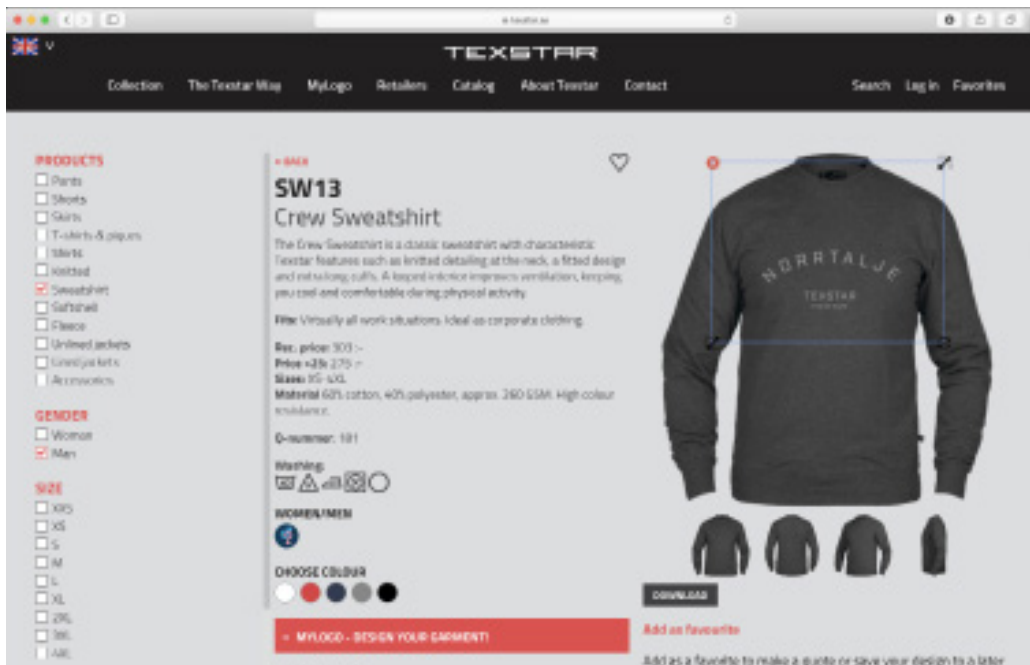

The products are delivered ready-packed and complete with logos, while a well-oiled distribution system allows us to offer just-in-time delivery on request.

We are proud of our ISO 9001:2015 quality certification, which attests to our continuous efforts to develop and improve in cooperation with our customers.

“It’s incredibly easy to integrate Texstar’s online shop, with logos correctly attached and full control of costs and deliveries. And the interface looks great too!”

- 1 Choose a garment on textstar.se.
- 2 Click on +MyLogo.
- 3 Select Embroidery or Transfer.
- 4 Upload a logo or enter text in the box and place it where you want it on the garment.
- 5 Done! Show off your creation to your colleagues.

BUILD YOUR WORLD – WATCH YOUR TEAM TAKE SHAPE IN JUST FIVE CLICKS

On our website, you can try out your logo on all the garments and then show your colleagues how great it looks. Nothing could be easier!

You can easily find the products you need on the new Texstar website, www.textstar.se. After finding your product, click on MyLogo to upload the text or logo you want to see displayed on the garment. Design the garment from the front, back and sides, then save the pictures to your hard disk. It doesn't get much simpler than this.

Choose transfer printing, appliqué or embroidery

Transfer printing [1] is the most

commonly used printing technique today, and offers high flexibility. The actual image is printed on a separate carrier and then transferred to the garment through a thermal process. This technique allows you to easily create clear, bright colours and very fine details. It suits a wide range of applications, from frequently used work clothes – where long-term quality and durability are essential – to simpler items that might only be used on one occasion.

Embroidered appliqué [2] – embroidery on woven badges, leather, reflectors, etc. – is a great way of customising your garments. You can create more detailed images than with direct embroidery, and the image can be attached in

various ways depending on your needs and requirements. The image is embroidered separately and then either sewn or ironed onto the garment.

Direct embroidery [3] means that a logo or other image is embroidered directly onto the garment. It gives an elegance that is hard to beat, and the embroidery remains permanently in place. This technique creates unmistakable style and quality and gives clothing a distinguished look.

Are you looking for a different method? We can provide it. Other popular techniques include *screen printing* [4] and *woven patches* [5]. For more information about available options, speak to your dealer or call us. The optimum technique may vary according to the garments and materials you are working with – as well as your time frame.

**THE
TEXSTAR
EXPERIENCE™**

DESIGNING FOR AWESOME WORKING DAYS.

TROUSERS THAT ALWAYS LOOK GREAT.

How many times do you bend down during your working day?

Many people use a pedometer to count the number of steps they take.

We're less aware of how many times we bend down and stand up, even though certain jobs involve bending or crawling around hundreds of times a day. With their comfortable stretch, Texstar trousers make bending down easy. And your trousers will keep their shape even after countless bends and stretches.

TECH STRETCH PANTS

FP43 Men | WP43 Women

Stylish, scratch-resistant trousers with a tight and comfortable fit. Made of Ripstop fabric, a cotton-polyester blend for high strength and durability. A man with long, dark hair and a beard is captured in mid-air, performing a horizontal leap across a narrow, cobblestone street. He is wearing a white long-sleeved shirt and black trousers. His hair is flying upwards, suggesting movement. The street is flanked by white buildings with black wrought-iron balconies and street lamps. The sky is clear and blue. The overall scene conveys a sense of freedom and movement.

TEXSTAR STRETCHY

Enjoy being well dressed at work. We've got the trousers you want. Flattering fit with comfortable 4-way stretch. Discreetly reinforced material which allows full freedom of movement.

I LOVE MY T-SHIRTS AND PIQUE SHIRTS.

*Some jobs are tougher than others. Like driving a truck that can lift over 2 tonnes vertically to a height of more than 6 metres. This involves enormous force and leaves no margin for error. Although Texstar's clothing can't promise to eliminate errors, we can make sure your team members look well coordinated in matching colours – whatever job they do. For instance, our T-shirts and pique shirts have become everyday personal favourites among staff members'. Many even wear them outside work because **they look great and feel comfortable.***

CREW T-SHIRT

TS13 Men | WT13 Women

As soon as you put on one of these popular T-shirts, you'll notice how comfortable it is. The secret lies in its fashionable cut and the material – soft, comfortable 100% ring-spun brushed cotton certified under Oeko-Tex Standard 100. What's more, it's designed for professional wear and keeps its shape wash after wash. There's a pocket on the left sleeve and tape inside the neck for an optimal fit from shoulder to shoulder. This prevents wrinkling and twisting.

Suitable for	Ideal as workwear and corporate clothing.	
Material	100% ring-spun brushed cotton, approx. 160 GSM, material Oeko-Tex Standard 100. (Heather gray: 95% cotton, 5% Viscose. Anthracite: 50% cotton, 50% polyester)

WELCOME TO THE FUTURE.

Texstar Sustainable Garment is Texstar's new range of sustainable clothing. All the garments are GOTS certified (see p. 7). The GOTS standard imposes strict requirements throughout the production chain with regard to both environmental impact and factory working conditions. GOTS supports organic, sustainable farming without the use of toxic pesticides and fertilisers, with the vision of achieving ecologically sustainable production.

Among other things, this means only using sustainably farmed organic cotton. At present, only 1% of the world's

cotton production is organic, and the industrial farming process uses vast amounts of water to produce just one T-shirt.

Texstar is working on making its entire range as environmentally sustainable as possible. There's still a long way to go, but we're doing our best. This places high demands on us as producers to offer sustainable options, and on consumers to demand products that contribute to a better world.

Welcome to the future – welcome to *Texstar Sustainable Garment*.

TEXSTAR SUSTAINABLE GARMENT

ECO FUSION T-SHIRT

TS21 Men | WT21 Women

A lot of hard work went into developing our new T-shirt in 100 % organic cotton fibre. GOTS certified and available in attractive women's and men's cuts – what more could you want? Stretch tape inside the neck provides added comfort. We can't wait for you try it for yourself.

★ TEXSTAR SUSTAINABLE GARMENT

ECO FUSION PIQUE

PS21 Men | PW21 Women

It's here at last! Our first GOTS certified pique shirt in 100 % organic cotton fibre. A stylish, well-cut pique shirt available in women's and men's cuts. Stretch tape in matching colour on neck and side slits for optimal fit. The men's version has three buttons at the collar, the women's version has five buttons. We're extremely proud to introduce this product to our range.

**THE
TEXSTAR
EXPERIENCE™**

DESIGNING FOR AWESOME WORKING DAYS.

A HOODIE FOR EVERYDAY WEAR.

*It feels great to put on a sweatshirt in the morning.
It looks good and feels soft and comfortable – and
when you need to focus on your job, the hood is useful
for screening off distractions.*

HOODED CARDIGAN

HC03 Men | WC03 Women

One of our best sellers, a popular favourite. A high collar and hood give this cardigan attitude, and concealed side pockets enhance its simple design. The extra long cuffs keep it in place even if you move around a lot. This garment has excellent quality and colour resistance and maintains its shape very well. Close your eyes and imagine it embellished with your company logo!

**THE
TEXSTAR
EXPERIENCE™**

DESIGNING FOR AWESOME WORKING DAYS.

SUITS WITH STYLE.

*Classic elegance is always in style.
A professional suit should fit perfectly, make
the wearer feel well-dressed, offer good freedom
of movement and stand up to daily wear.*

FROM PLASTIC TO PERFECTION

Plastic is the main type of waste found in the world's oceans, which are becoming dumping grounds at an ever faster rate with devastating consequences for marine life. Every year, increasingly vast quantities of plastic accumulate in the sea. This is something we can help to change.

The TAILOR's REPEAT collection with NEWLIFE™ Recycled Polyester helps reduce environmental impact by making sustainable changes which involve taking greater product responsibility and producing clothes in a more eco-friendly and resource-saving way. The material in the REPEAT suit is a mixture of NEWLIFE polyester from recycled PET plastic bottles and virgin wool/Merino wool (mulesing-free) with elastane stretch for extra comfort. REPEAT garments are designed and made to last longer, thus prolonging their useful life and reducing environmental impact.

HOW IT WORKS

MEN'S ELEGANT SUIT

VJ04/VV04/VP04 Men

THE
TEXSTAR
EXPERIENCE™

DESIGNING FOR AWESOME WORKING DAYS.

HI-VIS CLOTHING. WHEN VISIBILITY IS CRUCIAL.

It's smart to be visible. Texstar's hi-vis clothing keeps you visible in vulnerable work settings. The garments confirm to the international EN ISO 20471 standard for high visibility workwear.

**THE
TEXSTAR
EXPERIENCE™**

DESIGNING FOR AWESOME WORKING DAYS.

IF YOU'RE NOT VISIBLE, YOU DON'T EXIST TEXSTAR HI-VIS CLOTHING MAKES YOU SHINE.

Make sure you and your colleagues are always visible. Texstar's Hi-Vis collection keeps you visible in vulnerable work settings and all light conditions.

The importance of hi-vis clothing cannot be overstated in vulnerable work settings. You may be hard to see in dark or twilight conditions – and you shouldn't take any chances. Make sure you wear the right type of hi-vis clothing for your job.

It is crucial that the clothing fits well and is comfortable to wear, without compromising on safety. Like all Texstar products, our Hi-Vis range of high visibility clothing is well-designed with smart details.

This is important to us.

Visibility in all conditions

You might be especially hard to see in the dark and at twilight, particularly for people driving vehicles or operating mechanical equipment.

But reduced visibility can also occur in daylight conditions.

In such situations, it's advisable to wear garments that make you more visible, with fluorescent colours in daylight conditions and reflectors that show up in headlights.

Hi-Vis 1.0 – a basic collection

Many of Texstar's customers have requested high visibility products, so we're now releasing the first part of our new Hi-Vis collection. The collection consists of five garments specially designed for the transport, staffing and construction sectors.

EN ISO 20471 – a uniform standard

The international EN ISO 20471:2013 standard imposes requirements for

high visibility workwear. It is based on minimum areas of retroreflective, fluorescent and/or combined performance materials and how they should be positioned on workwear. Texstar Hi-Vis is based on this standard, and can be combined with other certified garments to achieve the required safety class.

COMBINED CERTIFICATION FOR ENHANCED VISIBILITY

All garments certified according to EN ISO 20471 are divided into three safety classes: 1–3. Different safety classes can be achieved through a combination of different garments. This is known as combined certification. A garment's safety class depends on the size of the retroreflective and fluorescent areas.

Texstar Hi-Vis is classified according to this system, and our garments currently meet the requirements for safety classes 1 and 2. The table shows how they can be combined and which safety classes can be achieved by doing this. The table below shows the minimum areas required in order to be approved under the standard. Contact us to find out more about Texstar Hi-Vis and the maximum size your printed and embroidered applications can be in order to remain compliant with a given safety class.

Material	Fluorescent (m²)	Retroreflective (m²)
Class 1	0,14	0,1
Class 2	0,5	0,13
Class 3	0,8	0,2

Minimum area required for compliance with the safety classes according to EN ISO 20471.

PROTECTING SECURITY GUARDS.

Security guards are frequently on the move – getting in and out of cars, doing rounds, responding to call-outs, or guarding entrances and specific locations where they represent their company. Wearing comfortable and practical work clothes makes the job a little easier. And of course, it's an added plus if the clothes look good too.

The Texstar Security collection for security personnel is specially designed to meet high demands for comfort and good fit. And needless to say, they come in a wide range of sizes and in women's and men's cuts in line with the Texstar concept. Everyone should feel good wearing Texstar clothing.

SECURITY TROUSERS

Sizes	AP05  One size (4 in same colour/pack)	
Q number	208	

SIZE GUIDE – FIND YOUR SIZE

We offer a range of sizes to help you find the perfect size. When choosing a sweater or jacket, check the size of garments you already own that fit you well. Then compare them to our tables to find your size. Our trousers are sized in inches, not centilong. This is because we offer several fits for each size, to help you find the perfect fit. Check your measurements to pick garments that will fit you like a glove. It's easy, really: all you need is a tape measure.

How to measure

1 Chest

Measure around the fullest part of your chest.

2 Waist

Measure your waist at the height where you usually wear your jeans. Consider the type of jeans you usually wear: if they are low-waisted, measure lower down. If they are high-waisted, measure higher up. If you tend to wear your jeans at hip height, measure there.

3 Hip

Measure around the fullest part of your hip.

4 Inseam

When you measure the length of a pair of trousers, always measure the inseam (the inside part of the leg). The easiest way is to measure a pair of trousers that fit you well. Measure from the crotch down to the bottom of the leg.

Tip! If you own a pair of jeans that fit you well, you can check what size they are. Jeans sizes consist of two different measurements (in inches), like 30/32. The first number is the waist measurement, the second is the length measurement.

CARE INSTRUCTIONS

All Texstar clothes are carefully tested and easy to care for. Follow the washing instructions to maximise the garment's lifespan while caring for the environment:

- ★ Always sort clothing according to temperature and colour. Garments marked "Wash with similar colours" may run during washing and stain other clothing. This problem usually disappears after a few washes.
- ★ Coloured garments should always be washed at the highest recommended temperature for each garment.
- ★ To protect zips, close them before washing.
- ★ It is usually unnecessary to include a pre-wash in the washing cycle. Treat stubborn stains with stain remover before washing.
- ★ Coloured clothing should be washed with special detergent for coloured fabrics to prevent fading.
- ★ Dose the detergent according to the package instructions and your water hardness. Your local council can usually provide information on the water hardness in your area.
- ★ Avoid detergents containing the bleaching agents sodium hypochlorite, sodium perborate or sodium percarbonate.
- ★ Also check that your detergent is appropriate for the temperature you are washing at.
- ★ Do not use fabric conditions.
- ★ Most clothes benefit from being hung up to dry. Always shake and stretch them out before hanging. This is particularly important for knitted materials.
- ★ If you choose to tumble dry clothing, stop before it is completely dry to prevent unnecessary shrinkage and wear.
