

CARE

CARE INSTRUCTIONS

All Texstar clothes are carefully tested and easy to care for. Follow the washing instructions to maximise the garment's lifespan while caring for the environment:

- Always sort clothing according to temperature and colour. Garments marked "Wash with similar colours" may run during washing and stain other clothing. This problem usually disappears after a few washes.
- Coloured garments should always be washed at the highest recommended temperature for each garment.
- To protect zips, close them before washing.
- It is usually unnecessary to include a pre-wash in the washing cycle. Treat stubborn stains with stain remover before washing.
- Coloured clothing should be washed with special detergent for coloured fabrics to prevent fading.
- Dose the detergent according to the package instructions and your water hardness. Your local council can usually provide information on the water hardness in your area.
- Avoid detergents containing the bleaching agents sodium hypochlorite, sodium perborate or sodium percarbonate.
- Also check that your detergent is appropriate for the temperature you are washing at.
- Do not use fabric conditions.
- Most clothes benefit from being hung up to dry. Always shake and stretch them out before hanging. This is particularly important for knitted materials.
- If you choose to tumble dry clothing, stop before it is completely dry to prevent unnecessary shrinkage and wear.
